## Floor Mount Freestall System

The most open stall system on the market

The cornerstone of the Artex Comfort Zone™, our Floor Mount Freestall System provides unobstructed lunge space and open loops that allow animals to rest naturally in comfort.

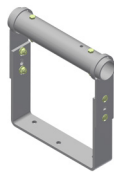

Designed to work with mattresses, this system utilizes existing concrete eliminating the need for posts or columns, reducing building and installation costs. It's height can easily be adjusted, allowing you to customize the stall size based on the age, breed, and size of your animals.

All components of the Floor Mount Freestall System are hot dipped galvanized and can be paired with your choice of hot dipped galvanized or pre-galvanized loops. Artex galvanization ensures a long life span and a more durable product.

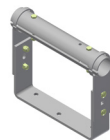

- » Easy installation
- » Adjustable for height
- » Designed for use with mattresses
- » Pairs with most Artex loops
- » Works with deep bedding
- » Hot dipped galvanized components
