Post Mount Freestall System

A versatile low-cost solution for any facility

The Artex Post Mount Freestall System is a cost-effective solution for new or retrofit facilities. Designed to mount directly into the concrete, this system is easy to install and can easily be adjusted to various heights after installation.

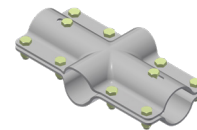

Compatible with all Artex stall dividers, this system also comes with a variety of mounting clamp options for both round and square posts making it the perfect fit for any facility.

Artex Post Mount Freestalls are available in both hot dipped and pre-galvanized options ensuring durability and a long life span.

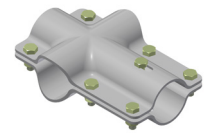

- » Open front design for easy entrance
- » All components are hot dipped galvanized
- » All hardware is zinc plated with Nylock bolts
- » Wide variety of clamp and mount options
- » Can be used with all bedding types
- » Can be paired with all Artex loop styles
